Design Innovation 23
Creative Programming and Electronics

Instructor: Kuan-Ju (KJ) Wu

DES-INV 23 explores the creative and expressive nature of computational approaches to art and design. We write code like writing poems, to tell a story or to express our feelings. We also build machines like building sculptures, by focusing on the aesthetics of the machines and the affordances of the interactions.

Sound of Sand

Cassidy Mountjoy & Mason Ziedonis

Thinkin Bout You

Andrew Kim & Jessica Lee

Portable EDC

Vincent Tantra & Trevor Aquino

Fish

Adam Saleh & Dylan Lew

Seasons

Myungjin Jung & Hoyun Kim

Light of an Egress

Rebecca Chen & Miriam Metz

Tron Inspired

Carson LaGro & Andrew Harris

Sounds of Earth

Wendy Yang

Echo

Jarvis Yuan

Fruity Loops

Scott Numamoto & Silvia Kim

Virtual Reality Inspired
